

CyclonicAir
BLADELESS INNOVATION

CyclonicAir PRO Pure Climate Bladeless Fan

Welcome to CyclonicAir™ - www.cyclonicair.com

Thank you for choosing the CyclonicAir PRO Pure Climate — our advanced bladeless fan with integrated HEPA filtration, cooling, and heating. Designed with your comfort and air quality in mind, this appliance provides safe, silent, and effective year-round performance.

Product Overview

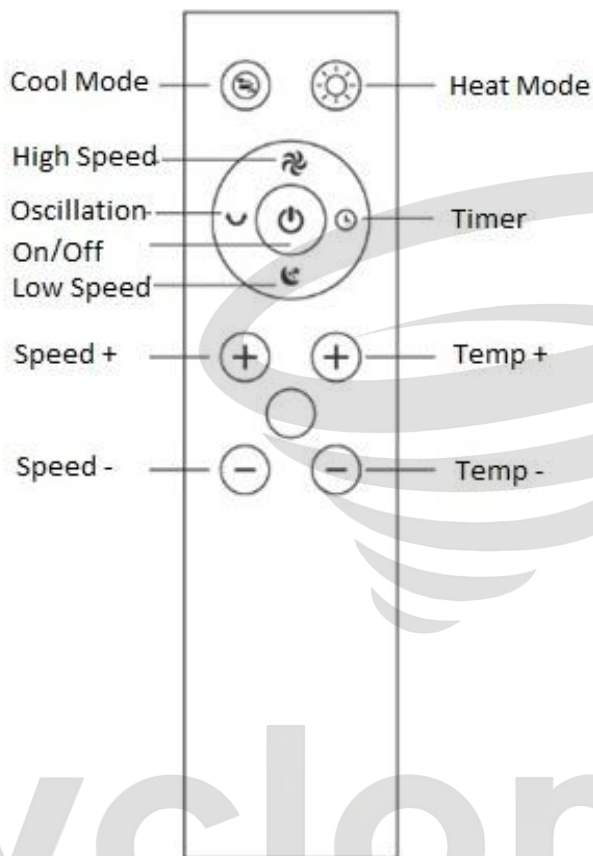

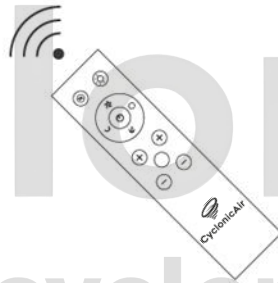

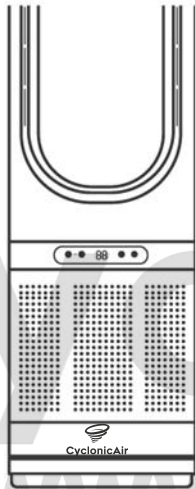

Model: CA-PEC046JR
Voltage: 220–240V ~ 50/60Hz
Cool Power Consumption: 30W
Heating Power Consumption: 1200W
Oscillation Angle: 80°
Cool Mode Speeds: 8 Levels
Heating Mode Levels: 3 Levels
Thermostat Range: 20°C–35°C
Timer: 1–8 hours
Safety: Tip-over protection, overheat cut-off

www.cyclonicair.com

Getting Started

1. Place the fan on a flat, stable surface.
2. Plug it into a standard 220–240V socket.
3. Use the remote control or the on-unit power button to begin.

Remote Control Functions

- Power: On/Off (remembers last-used setting)
- Cool Mode: Activates bladeless airflow (8 speed levels)
- Heat Mode: Activates heating function
- Temperature +/-: Adjust target temperature (20–35°C)
- Speed +/-: Adjust fan speed
- Oscillation: Enable/disable 80° rotation
- Sleep Mode: Gentle airflow for sleep (Displays "LL")
- Boost Mode: Maximum airflow (Displays "HH")
- Timer: Auto shut-off from 1–8 hours

Operating the Remote Control

- Point the remote at the display panel (infrared sensor is near the screen)
- Use within 5 metres, aimed directly at the unit

Switching Modes:

- Press Cool Mode to activate cooling. Adjust speed with Speed + / -
- Press Heat Mode to activate heating. Adjust temp with Temperature + / -

Airflow Control:

- Use Speed + / - for airflow intensity (1–8 in Cool, 1–3 in Heat)
- Press Oscillation to rotate the fan side-to-side (80°). Press again to stop.

Sleep Mode:

- Press Sleep for a quiet mode that reduces airflow gradually — ideal at night

Boost Mode:

- Press Boost for maximum airflow (shows "HH" on display)

Timer Function:

- Press Timer to cycle through 1–8 hour auto shut-off options

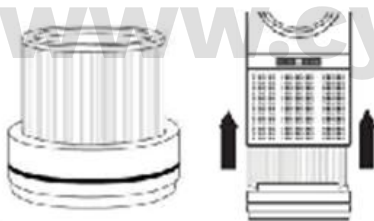

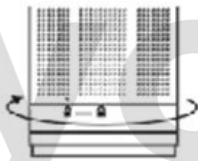

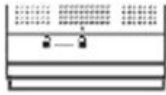

Battery Info:

- Uses 2x AAA batteries. Insert with correct polarity (+/-).
- Remove batteries if unused for long periods

Using the Heating Function

- Press Heat Mode; screen shows current ambient temp
- Set temp with Temperature +/- (20–35°C)
- Display flashes for 5 sec, then returns to ambient temp
- Heating activates if room temp is below set temp, and stops once reached
- The unit enters standby 20 seconds after heating ends

Filter Maintenance

Replace the HEPA filter every 3–6 months for optimal air quality.

1. Unplug the unit
2. Turn the bottom housing anti-clockwise (align with unlock icon)
3. Lift to separate the fan from base
4. Replace with a new filter
5. Align and twist back clockwise until it clicks securely

Cleaning & Maintenance

- Always unplug before cleaning
- Wipe outer shell with a damp cloth and dry thoroughly
- Do not allow water near internal parts
- Vacuum air inlet/outlet to remove dust
- Check plug/socket for dust regularly

Safety Warnings

- Indoor use only
- Keep away from water, heat, flammable materials
- Do not cover air outlets
- Do not insert objects into air outlets
- Supervise children when in use
- Unplug when not in use or moving the device
- Do not use if damaged — contact support
- Only use with fixed 3C certified socket (no extension leads)

Troubleshooting

Issue	Solution
Fan not turning on	Check power plug and press power button
Weak airflow	Increase speed / check filter or for blockages
Remote not working	Replace AAA batteries, ensure line of sight
Heating not working	Ensure target temp is above current room temp
Fan unresponsive after outage	Unplug for 10 sec, then restart

Warranty & Support

This product includes a 2-Year Warranty when registered online within 30 days:

Register: www.cyclonicair.com/register

Your warranty includes:

- Free replacement of faulty parts (excluding filters)
- UK-based customer service
- Priority support

Support Contact: 0151 837 1645
